

VINTAGE AND MILITARY AMATEUR RADIO SOCIETY

M0VMW

Non profit making, democratic and specially for the licensed radio amateur, short wave listener and all those interested in collecting and restoring old radio communications and other vintage electronic equipment, the Vintage and Military ARS aims to serve this important growing special interest niche.

Concentrating on ex-military wireless, vintage commercial and home made amateur radio communications equipment, early RADAR, more or less anything using valves, plus the preservation and continued use of traditional modes including amplitude modulation within the amateur bands. If you have any interest in these, this society is a must, providing:

- *A regular newsletter sent to all members with descriptive, informative and technical articles on old radio communications gear, and also incorporating a specialist exchange, for sale and wanted ads section for members;*
- *An exchange between members of information about equipment restoration, modification, setting up and use;*
- *Technical help, advice and assistance to members;*
- *Organised nets on the amateur bands for people wishing to set up, test and operate ex-military and vintage radio communications equipment;*
- *Displays and demonstrations of ex-military and vintage radio communications gear.*
- *Keeping an eye on national and international regulatory trends and when necessary making representations to government agencies and/or co-operating with other national societies to ensure the continued licensed use of old radio communications gear within the amateur bands.*

Also, if there is sufficient interest, in the future providing a valuation service for vintage radio communication equipment.

Amateur band vintage activity centre: 3625kHz. Activity to be found most days on AM and SSB subject to suitable conditions.

Weekly AM net on **3615kHz** ± QRM on Saturday mornings, start time 0830 hrs.
